

## Press release

## SG/RUSSELL: the success of multi-management

#### • The agreement

In March 1998, two big names in fund management, SG Asset Management (a European leader in fund management) and Frank Russell Company (the world leader in multi-management) formed an agreement to launch, for the first time in Europe, the concept of multi-manager funds. The joint venture aims to develop, manage and distribute a complete range of funds based on Multi Asset Multi Style Multi Manager<sup>TM</sup> approach.

## • The concept

This concept is entirely new to Europe : combining different management styles and selecting the best managers in the world.

- ⇒ the combination of different styles reduces volatility and therefore ensures regularity of performance with limited risk. This combination of styles remains dynamic with periodical adjustments.
- ⇒ the selection of managers is much more efficient than the selection of products based on past performance alone: only the in-depth analysis of the quality of the management teams and investment process serve as a measure of performance over time. In addition, management mandates are given to different managers which enable SG/Russell Asset Management to assign specific management objectives, to track and control performance and to obtain the best services conditions.

In order to avoid any conflict of interest, SG Asset Management has excluded itself from the manager selection.

#### • The product: SG/RUSSELL Funds

Since the end of July 1998, when launch of first subfunds, nine subfunds have been created in different asset classes.

Subfund	Currency	Launch date
<ul> <li>US Equity (large cap)</li> <li>US Small Cap</li> <li>Pan European Equity</li> <li>European Small Cap</li> <li>Pacific Basin (ex Japan) Equity</li> <li>Japan Equity</li> <li>Global Bond</li> <li>Global High Yield</li> </ul>	USD USD EUR EUR USD JPY EUR EUR	31/07/98 31/07/98 31/03/99 31/07/98 30/06/99 31/05/99 30/06/99 31/07/98
<ul><li>Europ Fixed Income</li></ul>	EUR	31/03/99

### • An outstanding success

In 12 months, more than USD 1.4 billion have been collected (FRF 9 billion) and the asset under management would be reached USD 2 billions at the end of the year.

Three quarters of assets under management come from France across all client types: private clients from the Société Générale network, small and medium sized companies, associations, investment managers, large institutional clients. Our profile funds, SELECT GESTION, sold to French private clients, are also invested in these funds.

In Europe, this concept has been well-received and a number of distribution agreements have been, or are in the process of being, signed with large banking networks in Italy, Germany, Spain, Austria and Benelux.

Philippe Collas stated: "with SG/RUSSELL, we have a concept of multi-manager funds which is unique and revolutionary in Europe. Given the success already achieved, we have revised the objectives in assets under management of USD 5 billion for 2002 to USD 10 billion."

Encl. : list of managers selected according to their style and investment type Management report at end-September 1999 can be obtained on request
