LYXOR AM EXTENDS ITS RANGE OF BOND ETFs AND LAUNCHES ON EURONEXT A NEW ETF BASED ON THE EUROMTS 1-3 YEARS INDEX

After launching its first bond ETFs in 2004, Société Générale subsidiary Lyxor AM today launches the Lyxor ETF EuroMTS 1-3 years fund on Euronext. This new ETF tracks the EuroMTS 1-3 years government bond index.

The EuroMTS Index was formerly the CNO Etrix and was acquired by EuroMTS from the French Bond Market Association (Comité de Normalisation Obligataire, or "CNO") on January 2003. It is the first independent, transparent, real-time and tradable government bond index for the European investment community. The EuroMTS range, EMTX is a family of euro-denominated indexes that track the performance of the eurozone government bond market. The EMTX family is made up of a global index and six sub-indexes covering bonds with maturities of 1-3 years, 3-5 years, 5-7 years, 7-10 years, 10-15 years and 15 years and over.

Lyxor ETF EuroMTS 1-3 years is a continuously traded fund that gives investors a simple and highly liquid way of gaining exposure to a sample of securities representing the short-term debt of the various eurozone governments. Like all bond ETFs managed by Lyxor AM, liquidity on this new fund is provided by SGCIB et IXIS Corporate and Investment Bank.

Lyxor AM has five government bond index funds. These ETFs enable investors to gain exposure to all or part of the eurozone yield curve, as well as to inflation-linked bonds. Assets under management in these ETFs now total over EUR1.5bn.

Lyxor ETF EuroMTS 1-3 years was approved by the AMF (Autorité des Marchés Financiers - French financial markets regulator) on 6 September 2005. The full prospectus is available on request, or from the www.lyxoretf.fr website.

Exchange Traded Funds (ETFs) are listed index funds that are traded on Euronext's cash markets. These funds track the performance of an index, and combine the advantages of shares (simple, constantly traded securities) with those of traditional investment funds (broad range of securities, geographical and/or sector diversification). Euronext's NextTrack segment makes it easier for investors to identify these products and to select an index or portfolio type from the range of ETFs on offer.
